

IN THE SPECIFICATION

Please cancel the entire specification of the subject US patent application, as filed, including the List of Reference Symbols, as set forth in the verified translation of PCT/DE03/00163, in favor of the concurrently filed Substitute Specification. That substitute specification is the result of the entry into the verified translation of a cross-reference to related applications and suitable section headings, the addition of a discussion of a prior art reference, as was done in the PCT application, the deletion of references to claims, the correction of minor errors in phrasing, grammar and punctuation, and a general revision of the verified translation, to place the substitute specification more in a form in accordance with US practice. These various changes and corrections do not constitute any new matter. A marked-up copy of the verified translation, which shows the changes made to arrive at the substitute specification, is enclosed for the Examiner's review.
